Project Name -
Toxic Comment Classification

[Click here to go to Project link](#)

Deadline - 15 Days

Instructions -
1) Click on the [project link](#) to open the project page.
2) Create an account on Kaggle
3) Enroll in the given competition
4) Download the data set and instructions
5) Create the model and project report([click here for sample project report](#)). Put it in a single folder along with problem statement description, compress it and then submit it in your project page.

You have to upload your files here before the deadline. No submissions will be entertained after the deadline. Deadlines won't be extended.

Deliverables from Candidate

1) A compressed folder containing all the project files along with project report and necessary data sets. If the file size is greater than 50 MB, then upload the project on a Github repository and then share the link of the repository in form of a text file.

Warning - Do not submit incomplete projects or projects that are not running. **You will be disqualified from this project stage and considered failed in this project if your projects are not running or incomplete or even if the report is incomplete.**
